

# Global United Technology Services Co., Ltd.

Report No.: GTS201607000065E02

# FCC Report (Bluetooth)

Applicant: Red Bear Company Limited

Address of Applicant: 1711 Block B, Wah Luen Industrial Centre, 15-21 Wong Chuk

Yeung Street, Fo Tan, Hong Kong

**Equipment Under Test (EUT)** 

Product Name: RedBear IoT pHAT

Model No.: PHAT-IOT

FCC ID: 2ABXJ-PHAT-IOT

Applicable standards: FCC CFR Title 47 Part 15 Subpart C Section 15.247:2015

Date of sample receipt: July 06, 2016

**Date of Test:** July 07-12, 2016

Date of report issued: July 13, 2016

Test Result: PASS \*

Authorized Signature:

Robinson Lo V Laboratory Manager

This report details the results of the testing carried out on one sample. The results contained in this test report do not relate to other samples of the same product and does not permit the use of the GTS product certification mark. The manufacturer should ensure that all products in series production are in conformity with the product sample detailed in this report.

This report may only be reproduced and distributed in full. If the product in this report is used in any configuration other than that detailed in the report, the manufacturer must ensure the new system complies with all relevant standards. Any mention of GTS or testing done by GTS in connection with, distribution or use of the product described in this report must be approved by GTS in writing.

This document cannot be reproduced except in full, without prior written approval of the Company. Any unauthorized alteration, forgery or falsification of the content or appearance of this document is unlawful and offenders may be prosecuted to the fullest extent of the law. Unless otherwise stated the results shown in this test report refer only to the sample(s) tested and such sample(s) are retained for 90 days only.

<sup>\*</sup> In the configuration tested, the EUT complied with the standards specified above.

# 4 Test Summary

| Test Item                        | Section in CFR 47 | Result |
|----------------------------------|-------------------|--------|
| Antenna requirement              | 15.203/15.247 (c) | Pass   |
| AC Power Line Conducted Emission | 15.207            | Pass   |
| Conducted Output Power           | 15.247 (b)(3)     | Pass   |
| Channel Bandwidth                | 15.247 (a)(2)     | Pass   |
| Power Spectral Density           | 15.247 (e)        | Pass   |
| Band Edge                        | 15.247(d)         | Pass   |
| Spurious Emission                | 15.205/15.209     | Pass   |

Pass: The EUT complies with the essential requirements in the standard.

Remark: Test according to ANSI C63.4:2014 and ANSI C63.10:2013.

## **Measurement Uncertainty**

| •                                   |                                      |                                 |       |
|-------------------------------------|--------------------------------------|---------------------------------|-------|
| Test Item                           | Frequency Range                      | Measurement Uncertainty         | Notes |
| Radiated Emission                   | 9kHz ~ 30MHz                         | ± 4.34dB                        | (1)   |
| Radiated Emission                   | 30MHz ~ 1000MHz                      | ± 4.24dB                        | (1)   |
| Radiated Emission                   | 1GHz ~ 26.5GHz                       | ± 4.68dB                        | (1)   |
| AC Power Line Conducted<br>Emission | 0.15MHz ~ 30MHz                      | ± 3.45dB                        | (1)   |
| Note (1): The measurement unce      | ertainty is for coverage factor of k | =2 and a level of confidence of | 95%.  |

## **5** General Information

## 5.1 Client Information

| Applicant:                       | Red Bear Company Limited  |
|----------------------------------|---|
| Address of Applicant:            | 1711 Block B, Wah Luen Industrial Centre, 15-21 Wong Chuk Yeung Street, Fo Tan, Hong Kong |
| Manufacturer/Factory:            | Red Bear Company Limited  |
| Address of Manufacturer/Factory: | 1711 Block B, Wah Luen Industrial Centre, 15-21 Wong Chuk Yeung Street, Fo Tan, Hong Kong |

## 5.2 General Description of EUT

| Product Name:        | RedBear IoT pHAT              |
|----------------------|-------------------------------|
| Model No.:           | PHAT-IOT                      |
| Operation Frequency: | 2402MHz~2480MHz               |
| Channel Numbers:     | 40                            |
| Channel Separation:  | 2MHz                          |
| Modulation Type:     | GFSK                          |
| Antenna Type:        | PCB antenna                   |
| Antenna Gain:        | 3.3dBi (declare by Applicant) |
| Power Supply:        | DC 5.0V                       |

| Operation Frequency each of channel |                           |    |           |         |           |         |           |
|-------------------------------------|---------------------------|----|-----------|---------|-----------|---------|-----------|
| Channel                             | Channel Frequency Channel |    | Frequency | Channel | Frequency | Channel | Frequency |
| 1                                   | 2402MHz                   | 11 | 2422MHz   | 21      | 2442MHz   | 31      | 2462MHz   |
| 2                                   | 2404MHz                   | 12 | 2424MHz   | 22      | 2444MHz   | 32      | 2464MHz   |
| . !                                 |                           |    | . !       | •       | • !       |         | . !       |
| 9                                   | 2418MHz                   | 19 | 2438MHz   | 29      | 2458MHz   | 39      | 2478MHz   |
| 10                                  | 2420MHz                   | 20 | 2440MHz   | 30      | 2460MHz   | 40      | 2480MHz   |

#### Note:

In section 15.31(m), regards to the operating frequency range over 10 MHz, the Lowest frequency, the middle frequency, and the highest frequency of channel were selected to perform the test, and the selected channel see below:

| -                   |           |
|---------------------|-----------|
| Channel             | Frequency |
| The lowest channel  | 2402MHz   |
| The middle channel  | 2440MHz   |
| The Highest channel | 2480MHz   |

## 5.3 Test mode

| Transmitting mode | Keep the EUT in continuously transmitting mode |
|-------------------|--|
|-------------------|--|

Remark: During the test, the test voltage was tuned from 85% to 115% of the nominal rated supply voltage, and found that the worst case was under the nominal rated supply condition. So the report just shows that condition's data.

## 5.4 Description of Support Units

| Manufacturer | Description | Model     | Serial Number | FCC Approval |
|--------------|-------------|-----------|---------------|--------------|
| Apple        | PC          | A1278     | C1MN99ERDTY3  | FCC DoC      |
| DELTA        | ADAPTER     | ADP-60ADT | N/A           | FCC DoC      |

## 5.5 Test Facility

The test facility is recognized, certified, or accredited by the following organizations:

#### • FCC —Registration No.: 600491

Global United Technology Services Co., Ltd., Shenzhen EMC Laboratory has been registered and fuly described in a report filed with the (FCC) Federal Communications Commission. The acceptance letter from the FCC is maintained in files. Registration 600491, June 22, 2016.

## • Industry Canada (IC) —Registration No.: 9079A-2

The 3m Semi-anechoic chamber of Global United Technology Services Co., Ltd. has been registered by Certification and Engineering Bureau of Industry Canada for radio equipment testing with Registration No.: 9079A-2, June 26, 2013.

## 5.6 Test Location

All tests were performed at:

Global United Technology Services Co., Ltd.

Address: No. 301-309, 3/F., Jinyuan Business Building, No.2, Laodong Industrial Zone, Xixiang Road, Baoan District, Shenzhen, Guangdong, China 518102

Tel: 0755-27798480 Fax: 0755-27798960

Telephone: +86 (0) 755 2779 8480 Fax: +86 (0) 755 2779 8960

## 7 Test results and Measurement Data

## 7.1 Antenna requirement

**Standard requirement:** FCC Part15 C Section 15.203 /247(c)

#### 15.203 requirement:

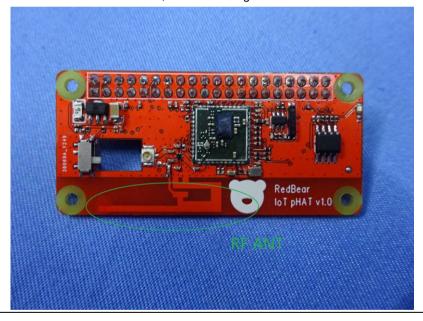

An intentional radiator shall be designed to ensure that no antenna other than that furnished by the responsible party shall be used with the device. The use of a permanently attached antenna or of an antenna that uses a unique coupling to the intentional radiator, the manufacturer may design the unit so that a broken antenna can be replaced by the user, but the use of a standard antenna jack or electrical connector is prohibited.

#### 15.247(c) (1)(i) requirement:

(i) Systems operating in the 2400-2483.5 MHz band that is used exclusively for fixed. Point-to-point operations may employ transmitting antennas with directional gain greater than 6dBi provided the maximum conducted output power of the intentional radiator is reduced by 1 dB for every 3 dB that the directional gain of the antenna exceeds 6dBi.

#### **E.U.T Antenna:**

The antenna is PCB antenna, the best case gain of the antenna is 3.3dBi

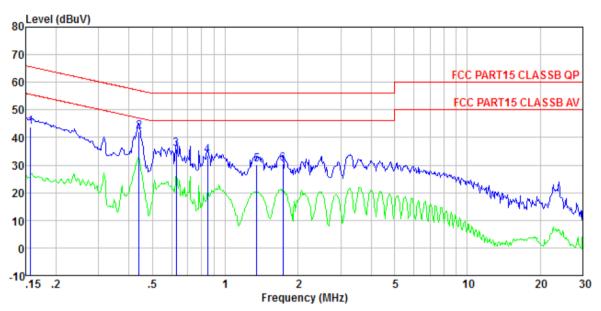

## 7.2 Conducted Emissions

| Test Requirement:     | FCC Part15 C Section 15.207   | ,  |           |  |  |  |  |
|-----------------------|---|--|-----------|--|--|--|--|
| Test Method:          | ANSI C63.10:2013  |  |           |  |  |  |  |

#### Notes:

- 1. An initial pre-scan was performed on the line and neutral lines with peak detector.
- 2. Quasi-Peak and Average measurement were performed at the frequencies with maximized peak emission.
- 3. Final Level = Receiver Read level + LISN Factor + Cable Loss
- 4. If the average limit is met when using a quasi-peak detector receiver, the EUT shall be deemed to meet both limits and measurement with the average detector receiver is unnecessary.

|                   | Antenna Tower  Horn Antenna  Turn Table  1.5m A Im A Amplifier  |  |  |  |  |  |  |
|-------------------|---|--|--|--|--|--|--|
| Test Procedure:   | <ol> <li>The EUT was placed on the top of a rotating table (0.8 meters below<br/>1G and 1.5 meters above 1G) above the ground at a 3 meter camber.<br/>The table was rotated 360 degrees to determine the position of the<br/>highest radiation.</li> </ol>   |  |  |  |  |  |  |
|                   | 2. The EUT was set 3 meters away from the interference-receiving antenna, which was mounted on the top of a variable-height antenna tower.  |  |  |  |  |  |  |
|                   | 3. The antenna height is varied from one meter to four meters above the ground to determine the maximum value of the field strength. Both horizontal and vertical polarizations of the antenna are set to make the measurement.   |  |  |  |  |  |  |
|                   | 4. For each suspected emission, the EUT was arranged to its worst case and then the antenna was tuned to heights from 1 meter to 4 meters and the rota table was turned from 0 degrees to 360 degrees to find the maximum reading.  |  |  |  |  |  |  |
|                   | The test-receiver system was set to Peak Detect Function and Specified Bandwidth with Maximum Hold Mode.  |  |  |  |  |  |  |
|                   | 6. If the emission level of the EUT in peak mode was 10dB lower than the limit specified, then testing could be stopped and the peak values of the EUT would be reported. Otherwise the emissions that did not have 10dB margin would be re-tested one by one using peak, quasipeak or average method as specified and then reported in a data sheet. |  |  |  |  |  |  |
|                   | 7. The radiation measurements are performed in X, Y, Z axis positioning. And found the Y axis positioning which it is worse case, only the test worst case mode is recorded in the report.  |  |  |  |  |  |  |
| Test Instruments: | Refer to section 6.0 for details  |  |  |  |  |  |  |
| Test mode:        | Refer to section 5.3 for details  |  |  |  |  |  |  |
| Test results:     | Pass  |  |  |  |  |  |  |

## Remark:

Pre-scan all kind of the place mode (X-axis, Y-axis, Z-axis), and found the Y-axis which it is worse case.
